SPECIFICATIONS

GNSS Features	
GPS	L1, L1C, L2C, L2P, L5
	L1C/A,L1P,L2C/A,L2P,L3
BDS	BDS-2: B1I, B2I, B3I
	BDS-3: B1I, B3I, B1C, B2a, B2b*
GALILEOS	E1, E5A, E5B, E6C, AltBOC*
	L1*
	L5*
	L1, L2C, L5*
MSS L-Band (Reserve)	1Hz~20Hz
	> 99.99%
middization rondomey	
Positioning Precision	on
Code differential GNSS	positioning Horizontal: 0.25 m + 1 ppm RMS
ONION staffs	Vertical: 0.50 m + 1 ppm RMS Horizontal: 2.5 mm + 0.5 ppm RMS
GNSS Static	Vertical: 5 mm + 0.5 ppm RMS
Pool time kinematic	Horizontal: 8 mm + 1 ppm RMS
(Raspling<30km)	Vertical: 15 mm + 1 nnm RMS
SBAS positioning	Vertical: 15 mm + 1 pm RMSTypically < 5m 3DRMS
RTK initialization time	2~8s
IMU tilt compensation	Additional horizontal pole tip uncertainty
	typically less than 10mm + 0.7 mm/° tilt down to 30°
IMU tilt angle	
Handriana Danfanna	
Hardware Performa	nce
Dimension	
Waterial	
	-35°C ~ +80°C
Humidity	100% Non-condensing
Waterproof/Dustproof	IP67 standard, protected from long
	time immersion to depth of 1m
	IP67 standard, fully protected against
	blowing dust
Shock/Vibration	Withstand 2 meters pole drop onto
	the cement ground naturally
Power supply	9-28V DC, overvoltage protection
Battery	Inbuilt 6800mAh rechargeable,
Potton / life	Li-ion batteryTypically 15h (static), 6h (Base+UHF)
Dattery lile	10h (Rover+UHF), 12h (Rover+Bluetooth)
	TOTE (NOVELTOTIE), 1211 (NOVELT DILLECOULT)
0	
Communications	F DINI FMO external resument i DCCCC
1/O Port	5-PIN LEMO external power port + RS232 7-PIN USB (USB+OTG+Ethernet)
	1 UHF antenna interface
Internal LIHE	2W radio, receive and transmit,
internal or il	radio router and radio repeater
Frequency range	410 - 470MHz
Communication protoco	olFarlink, Trimtalk450s, SOUTH,
·	HUACE, Hi-target, Satel
Communication range	Typically 8km with Farlink protocol
Bluetooth	Bluetooth 3.0/4.1 standard, Bluetooth 2.1 + EDR
NFC Communication	Realizing close range (shorter than 10cm)
	,
	automatic pair between receiver and
	controller (controller requires NFC
	automatic pair between receiver and controller (controller requires NFC wireless communication module else)

WIFI	
Modem	802.11 b/g standard
WIFI hotspot	Receiver broadcasts its hotspot form web UI
	accessing with any mobile terminals
WIFI datalink	. Receiver can transmit and receive correction
	data stream via WiFi datalink

Data Storage/Transmission

Storage......4GB SSD internal storage standard, extendable up to 64GB Automatic cycle storage (The earliest data files will be removed automatically while the memory is not enough) Support external USB storage The customizable sample interval is up to 20Hz
......Plug and play mode of USB data transmission
Supports FTP/HTTP data download
..Static data format: STH, Rinex2.01, Rinex3.02 and etc. Data transmission.. Differential data format: RTCM 2.1, RTCM 2.3, RTCM 3.0, RTCM 3.1, RTCM 3.2 GPS output data format: NMEA 0183, PJK plane coordinate, Binary code, Trimble GSOF Network model support: VRS, FKP, MAC, fully support NTRIP protocol

Sensors	
Electronic bubble	Controller software can display electronic
	bubble, checking leveling status of the
	carbon pole in real-time
IMU	Built-in IMU module, calibration-free
	and immue to magnetic interference
Thermometer	Built-in thermometer sensor, adopting intelligent
	temperature control technology, monitoring
	and adjusting the receiver temperature

G7

— New miniaturized RTK receiver —

Extraordinary GNSS....

The GNSS unit of G7 is integrated with an advanced **SoC** which is a chip comes with the advantage of high integration and low power consumption, efficiently suppress the interference signals, and obtain higher quality observation data from satellite constellations.

Combines with powerful GNSS RTK engine with **1598** channels, and the new generation high sensitivity antenna, G7 achieves centimeter precision in seconds while fully tracking GPS, GLONASS, BEIDOU, GALILEO and QZSS signals.

Brilliant design

Single button boot design, one button evokes all RTK operations.

The body screen adopts a translucent high-strength panel, which has a stronger visual sense of technology. Plus four color indicator lights, common information is clear at a glance.

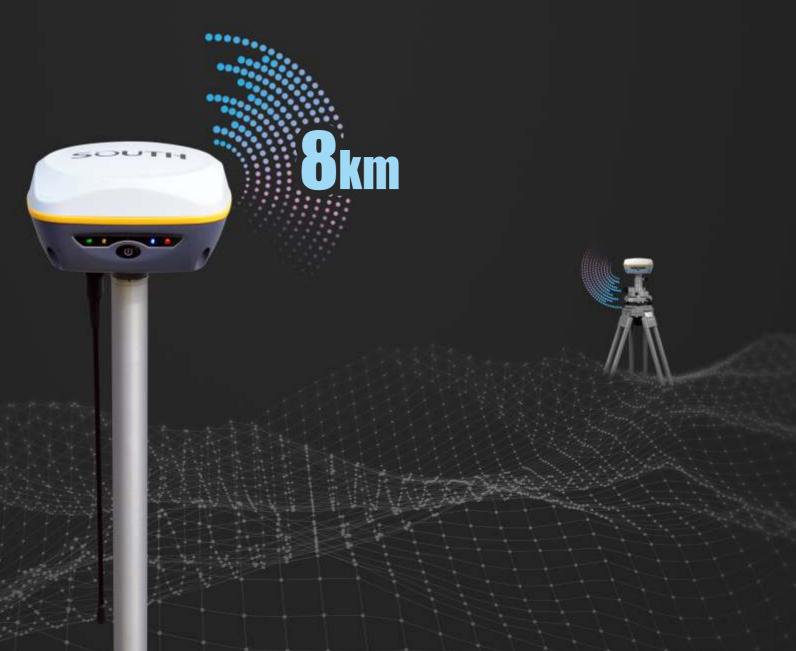

Smart unit of tilt measurement

An inbuilt high performance **IMU** automatic compensator which corrects the coordinates to the pole tip, that assists users quickly and accurately measure or stake out points at will without strict leveling the receiver, it helps surveyors boost productivity by 30 percent. Furthermore, the compensation is still available even though the fixed solution is lost at a short time, surveyors are able to continue the job after fixed solution recovers without initializing again for the IMU module. And the tilt angle range can achieve to 60°.

Unmatched connectivity

Built-in SOUTH self-developed digital radio, with an advanced protocol "Farlink", makes G7 achieve the typical working range as 8km. The transmission bandwidth of "Farlink" becomes large, and it increases the sensitivity of radio signal capture, which perfectly solves the problem of large data volume of multiple constellations transmission. And the power consumption can reduce about 60% in the same amount of data transmission compare to the traditional RTK.

Unlimited productivity

The new generation of SoC platform gives RTK more stable performance and lower power consumption. The built-in 6800mAh high-performance battery can support more than **15 hours** of continuous operation. Featuring with a universal type-C interface, G7 allows to charge the built-in batteries with a PD rapid charger, and support power supply from a power bank to ensure a full-day work.

Both internal memory and web interface are accessed by this type-C interface simultaneously without switching working mode for this port.
